

Meniere's disease: *Participants Needed* - Testing at the Electrophysiology Lab at Missouri State University, Springfield, MO

Have you been diagnosed with Endolymphatic Hydrops (Meniere's disease)?

Possible Symptoms:

- Vertigo/Dizziness
- Fluctuating hearing loss
- Ear fullness
- Ringing in the ear

We are looking for your participation in a study on inner ear function!

❖ Criteria:

- Normal or mild hearing loss up to 50 dBHL @2-4kHz
- No recent middle ear problems
- No known neurological disease
- Clinical diagnosis of early Meniere's disease

Principal Investigator

Wafaa Kaf, MD, MSc, PhD

Professor of Audiology

Missouri State University,
Springfield, MO

Email: wafaakaf@missouristate.edu

Phone: (417) 836-4456 (office)

Benefits to participating:

- Free hearing evaluation
- Free middle, inner ear, & hearing nerve evaluation
- Experimental electrophysiological recordings from inner ear & hearing nerve at fast click rates

❖ Total Time: about 2 ½ -3 hours

❖ We will schedule when you have the dizzy spell or shortly afterwards

You'll get \$75 when the testing has been completed - Funding from the Hearing Health Foundation
